

A horizontal grayscale heatmap representing a sparse matrix. The matrix consists of a grid of small gray squares. A single vertical column of larger gray squares runs down the center of the grid. This central column has a higher density of gray squares compared to the rest of the grid, which is mostly white. The overall pattern is a sparse matrix with a prominent central column.

The image consists of a single horizontal row of pixels. It features a repeating pattern of dark gray, black, and white blocks. The width of these blocks varies slightly, creating a textured appearance. The pattern is centered on a white background, which has two thick, dark gray vertical bars on its left and right edges. The overall effect is reminiscent of a low-resolution digital display or a corrupted image file.
