

A horizontal grayscale heatmap representing a sparse matrix. The matrix consists of a grid of small squares. Most squares are white or very light gray, indicating zero values. A single column of squares runs horizontally across the center of the image, where each square is either dark gray or black, indicating non-zero values. This pattern repeats across the entire width of the image.

The image consists of a dense grid of pixels in shades of gray, black, and white. The pattern is roughly rectangular and centered. It appears to be a low-resolution scan or a digital representation of a physical object, possibly a barcode or a specific type of label. The background is white, and there are some dark borders at the top and bottom.
