

A horizontal grayscale gradient bar consisting of a long sequence of small, uniform gray squares. The squares are arranged in a single row, creating a subtle gradient effect from light gray on the left to dark gray on the right. The overall appearance is that of a digital color calibration strip or a grayscale reference image.

A horizontal bar chart with 1000 data points. The x-axis is labeled with 'X' and the y-axis with 'Y'. The bars are colored in a gradient from light gray to dark gray, representing values from approximately -0.5 to 0.5. The distribution is roughly symmetric around zero, with a slight peak near -0.2 and another near 0.2.
